

Facts Sheet

KEA Climate Protection and Energy Agency Baden-Württemberg GmbH

1 Brief Description

KEA climate protection and energy agency of Baden-Württemberg GmbH (short: KEA-BW), based in Karlsruhe, was founded in 1994 and is the energy agency of the federal state Baden-Württemberg.

2 Mission

KEA-BW is actively involved in tasks and measures for climate protection in Baden-Württemberg. In particular KEA-BW advises public institutions, multipliers, companies and end users on energy saving, the rational energy use and the use of renewable energies as well as climate adaptation.

3 Unique Distinctions

As the climate agency for the state of Baden-Württemberg, KEA-BW works independently and impartially and feels committed to climate protection. With energy-related and economic expertise, many years of experience and the excellent networking of its employees, KEA-BW not only acts as a think tank, but also as an implementation workshop for climate protection. It offers its services to all stakeholders throughout Baden-Württemberg and to the state's ministries.

4 Associates

KEA-BW was founded in 1994 on an initiative of the state government. Since 2016, Baden-Württemberg is the sole shareholder.

5 Target Groups

Most of the KEA-BW's services are available, transparently and free of charge, to all interested parties, Their specific target groups are:

- cities and communities, counties (leading communal associations, municipal politics, property managements, building authorities, environmental departments, climate protection managers, environmental committees, energy commissioners)
- small and midsize enterprises (KMU), cooperatives, housing associates
- engineering offices, architects, energy consultants, craftsperson establishments, urban planners as well as their associations.
- Church institutions , hospitals, homes, and other social organisations, associations
- Schools and other educational institutions
- Private individuals (especially owners of buildings)

6 Structure and Fields of Activity

Since 2015/2016 the experience of the State Energy Agency KEA-BW has been available free of charge to all interested parties in the form of four competence centres with the following working contents:

- **Municipal climate protection** (strategies, concepts, instruments, measures as well as supporting framework conditions; especially: state offices for the European energy award eea)
- **Energy management** (non-investment measures on or in buildings and facilities of municipalities and companies; in particular: dissemination of quality assurance instruments Kom.EMS)
- **Contracting** (investment measures in buildings and systems, especially: support for energy supply and energy saving contracting projects)
- **Heat turnaround** (municipal heat planning, heat supply concepts, heating networks, CHP systems)

The competence centres provide advice in a manufacturer- and product-neutral manner and without any economic self-interest.

The fifth competence center is the Stuttgart based, impartial motivation and information program, **Zukunft Altbau (Future of old Construction)**. It offers citizens and all those involved in construction, advice and assistance on all questions relating to energy-efficient renovation of residential and non-residential buildings. Zukunft Altbau provides free information material, regular press work and a telephone hotline and is present at trade fairs, conferences and seminars.

Together with the Solar Cluster Baden-Württemberg e.V. KEA-BW also manages the photovoltaic network in the regions of the federal state. The network offers information and advice and organizes an exchange of knowledge and experiences on the topic.

The services above are financed by the Baden-Württemberg Ministry of the Environment.

The Sustainable Mobility division, which has been developed with financial support from the Baden-Württemberg Ministry of Transport, offers initial advice for municipalities, works for the Climate Mobil competence network, which is part of the Baden-Württemberg local transportation company (NVBM), and conducts public relations work on the subject of climate protection in transportation.

The KEA-BW offers free and up-to-date information and advice on federal and, in particular, state **funding programs**. Some of the state funding programs are supervised and accompanied directly by the KEA-BW itself.

In addition, KEA-BW is, to a small extent, active in the above-mentioned areas of work, on the one hand in research and demonstration projects funded by the EU, the federal government or the state, and on the other hand, it offers fee-based consulting services, in particular for the above-mentioned target groups.

7 The KEA-BW Team

KEA-BW has 40 permanent employees and employs, other freelancers, students, assistants and interns. Its managing director is Dr.-Ing. Volker Kienzlen.
